

## LEAD WEB DEVELOPER

Apply Here: [Hiring Interest Form](#)

### Quick Technical Support + Bringing Beautiful Design to Life = Lead Web Developer

You will have the opportunity to be creative, organized, and work on a variety of clients with your skills creating, managing, and delivering successful web projects.

**As a Lead Web Developer, you will maintain a raving fan relationship with our clients by solving challenging development needs, supporting the design team, and maintaining a high quality of product delivery.** Ultimately, you will lead web design department growth and continue to deliver amazing products for our clients.

#### Responsibilities

- **60% Front End Development:** Work with the Design Team to build beautiful and functional websites, solve unique challenges, manage custom code implementation, and regular work on site speed plus technical SEO.
- **20% Technical Support:** Work on existing clients to solve technical issues on their websites.
- **10% Collaborative Work:** You'll work with the Junior Developers to manage projects getting completed on a timely basis, and being a mentor in order to work together to solve problems.
- **10% Client Meetings and Presentations:** Create raving fans. You will participate in kickoff discussions and design presentations.
- **10% Hustle:** This extra 10% makes the total equal 110%...which is how much effort we need from every member of the team to make this dream happen! Together, let's build the dream marketing agency!

#### Position Expectations:

- Manage planning and implementation on big projects as assigned
- Communication with Clients where needed
- Completing Process. Kit checklists for web clients
- Take designs (both desktop and mobile) and develop them into fully functional WordPress sites.

- Manage Projects and maintenance requests
- Develop WordPress theme customizations on new projects and existing client sites.
- Customize WordPress functions, custom fields and develop proprietary plugins for client specific applications.
- Develop with e-commerce frameworks (WooCommerce, Shopify, etc.), multi-site deployments and advanced third-party integrations.
- Solve Technical UX and UI challenges for clients
- Knowledge of code versioning tools including Git, Mercurial, and SVN
- Experience working with debugging tools such as Chrome Inspector and Firebug
- Good understanding of website architecture and aesthetics
- Good communication skills
